## Residents Urged to Buy Cookies From Girl Scouts in Torrance

By VIOLA KLUG  
FR 5-5928  
The Torrance area Girl Scout cookie sale has been scheduled for the week of Feb. 18 to 26.

Local Scout officials urge residents to buy their cookies at the time, since cookie sales in the various towns are set at different times. Last year, girls in one Torrance area were disappointed because a group of Redondo Scouts had already covered the area. The local girls didn't sell one box in the area.

"Please wait until Feb. 8! to buy your Girl Scout cookies," is their plea.

About 500 Girl Scouts from the Harbor area will visit the new Girl Scout camp at Glendora to see what equipment will be needed and how profits from the cookie sales are to be used.

The teachers' luncheon given every month at the homes of Seaside PTA members to raise emergency funds was held at the home of Mrs. W. L. Steinwachs at 3320 Sharynne Lane on Jan. 19. ## Child with Broken Tooth Should Get Fast Attention

Children who have broken their front teeth in falls from the bicycle, roller skates and pogo sticks they got for Christmas should see their dentist immediately, the head of the children's department of USC School of Dentistry said today.

"January is always the open season for these injuries," said Dr. Francis W. Summers, professor, at SC. "Parents should never assume that a fall that breaks a child's tooth is a simple thing. The child should be taken to his dentist within three days at least."

A recent and painless operation developed by the dental profession can save between 90 and 95 per cent of children's broken teeth if performed in time away the injured part of Where it used to be common practice merely to pull the broken tooth or regard it as a bad tooth, dentists are presently

able to save the life of many broken teeth.

The process consists of cutting away the injured part of the nerve and then restoring the broken part of the tooth with plastic materials of gold.

The nerve ends heal over and the other remains vital and continues to grow. The operation takes only 10 to 20 minutes. Even a slight jolt to a child's tooth in a fall can injure the membrane between the root and the bone, parents were warned. Many times injuries to baby teeth that are seemingly innocent can mark or injure the permanent teeth in such a way that the damage can never be corrected. It was pointed out. The best insurance for a child's teeth is a visit to the dentist after any accidental fall that appears to have damaged the teeth, and especially if they have been broken, the SC professor said.
